

## **BIOFIBER PENCILS**

- Patented New Sustainable Pencils

## Patented New Pencil – BIO-FIBER PENCILS

### SUSTAINABILITY

- . Carbon Emission of the Biofiber pencil is only 23.40% of the wooden pencils
- . Made of Plant Fiber – Wastes recycled from agriculture and forest industry
  - Save Forest & Recycle Wastes both raw materials & in production

Such as saw dust, bamboo chips, nut shells, corn stems. Those wastes are smashed into fine powder, then mix with resin and extruded into pencils. No wood slat is used
- . Much simplify the processing steps of wooden pencils
  - Saves much power/energy
- . Avoid the following pollution in wooden pencil production:
  - a. water pollution – wood slat treating process
  - b. noise pollution – wood-working process
  - c. air pollution – painting process
- . Better and clean working conditions benefits employee's health.

## Unique Functions comparing to Wooden Pencil

1. Good Sharpening- core hard get broken and chips are in one piece
2. Pencil chips can be Re-Used to do activities
3. More durable - Over 30% extra long writing length/painting area than wooden pencils
4. Can be ANTIBIOTIC, SCENTED, LUMINOUS both in the barrel and core
5. Variety Choice on shapes. Besides the normal round, hex, triangle, we can supply square, star, heart, flower, oval & other novelty shapes
6. Solid bright colored barrels

## Re-Use Chips to do Activities!

Chips are shaved in one pieces and can be collected for kids to do activities.

They can use the chips to create their own art piece.
